WOMEN IN IT SECURITY

Veelasha Moonsamy is a tenured research faculty at the Horst Görtz Institute for IT Security at Ruhr-Universität Bochum (RUB). She is Associated PI of the Cluster of Excellence "Cyber Security in the Age of Large-Scale Adversaries" (CASA).

Her research interests include smart mobile security and privacy, malware detection, and applications of machine learning for systems security and privacy. She received her PhD from Deakin University, Australia, in 2015, and was a postdoctoral researcher and an Assistant Professor in the Digital Security Group at Radboud University, The Netherlands.
